

2010 ELECTRIC HEAT INCENTIVES

Southern Power District

In cooperation with Nebraska Public Power District's Energy Efficiency Program, Southern Power District is offering a incentive program to customers who convert their existing, fossil-fueled heating and cooling system with an energy efficient, ENERGY STAR qualified air source or ground source heat pump. The program is also offered to customers who upgrade their existing heat pump.

The rebate funds are available from two sources—Southern Power District and Nebraska Public Power District. To determine which rebates are available to you, refer to the chart below.

Once you decide to take the step to improve your home's efficiency with a heat pump, you will be required to have a performance verification completed in order to qualify for your incentive. This will assure that your heat pump is operating properly and assure the energy savings you deserve. The incentive for heat pump dealers is outlined in the chart below:

SYSTEM TYPE	REBATE CRITERIA	ENERGY WISE REBATE	SPD REBATE AMOUNT
REBATES FOR NEW & EXISTING HOMES (Conversions/Upgrades)			
AIR SOURCE HEAT PUMP	14 SEER ^{**} , 8.2 HSPF ^{***}	\$200	\$200*
AIR SOURCE HEAT PUMP	15 SEER ^{**} , 8.2 HSPF ^{***}	\$250	\$250*
AIR SOURCE HEAT PUMP	16 SEER ^{**} , 8.2 HSPF ^{***}	\$300	\$300*
GROUND SOURCE HEAT PUMP	ANY EER (Energy Efficiency Ratio)	\$400	\$400*
REBATES FOR HEATING/COOLING CONTRACTORS:			
ANY HEAT PUMP 14+ SEER	PERFORMANCE VERIFICATION WITHIN 10%	\$100	NA

* The SPD rebate is not valid for heat pump installations in NEW homes, only conversions or upgrades.

**Seasonal Energy Efficiency Ratio

***Heating Seasonal Performance Factor
