SOUTHERN POWER DISTRICT OUTAGE UPDATE

Southern Power District reports that Kenesaw, Funk, Hildreth, Inland, Riverton and Upland are now utilizing their generators to power their communities. Crews are working today to restore power to Norman by way of power lines.

Customers need to remember that once generators are brought online in communities, there are some damages to poles within communities that may disrupt some areas from receiving power from the generator.

Customers in Southern's rural areas will continue to see outages lasting several weeks.

Southern currently is utilizing the aid of an additional 220 linemen, adding to the roster of over 50 regular linemen on staff.
