

*Serving the agricultural, residential, business and community electric power needs of  
Adams, Franklin, Hall, Hamilton, Kearney, Merrick and Phelps Counties*

**PRESS RELEASE**

**January 12, 2007 4:30 P.M.**

**From: LeAnne Doose, Communications Director**

**SOUTHERN POWER CONTINUES TO SEE PROGRESS,  
BUT SLOWER OUTAGE RESTORATION**

Southern Power District currently has 2,719 customers that remain without power. Crews are continuing to work in all areas of the district to restore power, but some of our customers still face lengthy outages as work continues. The length of outages will vary for every customer, but it will likely be several weeks before some customers see power restored.

During the next several weeks, crews will be making permanent repairs in some areas, which may cause a disruption of power for those who have had power restored. Customers who lose power that is not restored within an hour can call Southern's outage line at 1-888-484-2470.

Recorded progress updates are available to Southern customers at 1-800-652-9809, and information about damages sustained by Southern Power District is available at [www.southernpd.com](http://www.southernpd.com).
