GENERATOR POWER DISRUPTED FOR KENESAW

The generator providing electricity to the village of Kenesaw this week malfunctioned at about 9:00 p.m. on January 12th. Power is out throughout the village.

Southern Power District is currently, and will continue to be working with NPPD throughout the night to bring a new generator online. It is not known at this time exactly when power will be back on line, but crews are working diligently at this time to restore power.
