SOUTHERN POWER DISTRICT PREPARES FOR WINTER BLAST

Southern Power District would like their customers to know that adverse weather conditions may contribute to power outages this weekend. There continue to be some areas within Southern's electrical facilities that are "weakened" due to the recent ice storm, and high winds that accompany blizzards could result in damage.

SPD crews are always on call, and SPD customers can report outages this weekend by calling 1-888-484-2470.
